WNS-ATQ-1009 - Waltham - Crown at 12 - Sub-Dial at 6 - Movement View

Case: The three part cushion shaped nickel silver case measures 32 mm across and 37 mm across (lug to lug.) It is 8 mm thick. The stem and crown is extended 3 mm from the case, and it is located at the 12 o'clock position. The inside of the back cover is marked Napoleon I.W.C. Co.

Dial: Round porcelain dial has a white color background and features beautiful Roman numerals with the XII having the very desirable red color while all the others are black in color. It has an antique-style single sunk 60 seconds sub-dial with a black hand and a 60 seconds scale around its outer edge and it is located at the 6 o'clock position. There is a 60 minutes scale at the outer edge of the dial. The antique-style hour and minutes hands are black in color. The crystal is curved on the surface and straight at the sides and is raised 4 mm above the case. It is marked Waltham below the 12 o'clock position.

Movement: 15 Jewel Mechanical Wind with ornate engravings and marked A.W.W. Co., Waltham, Mass. and the serial number

Strap: Brand new 18 mm genuine leather that is a light brown color and sewn with white thread around the edges with a "saddle leather look." It has a gold tone buckle.

Comments: Take a look at this pristine 1908 Waltham wristwatch with the crown and stem at the 12 o'clock position. It also features a very desirable porcelain dial with a red colored XII and a 60 seconds sunken sub-dial at the 6 o'clock position. The case is designed in three parts and has fancy engraved edges and is made of nickel silver metal. For a wristwatch over 100 years old it is in overall pristine condition--and what is more amazing is it keeps very accurate time.
