WNS-MDN-5013 - Padgett and Ingalls - Appalachian - Dial Close Up View

**Case:** All Stainless Steel Case Construction, Protective Crown Guard. Measures 41 mm across x 46 mm lug to lug.

**Dial:** Silver toned with with machined wafer designs, Military Numbers, Luminous Hands and Hour Markers, Quick Set Date, Signed Padgett & Ingalls Watch Company, Automatic, Appalachian, Trail Guide, and American Made.

**Movement:** Swiss High Grade ETA 2824-2 Automatic Movement, Screw Down Back, Water Resistant to 10 ATM, Hack Feature.

**Bracelet:** A high quality IW, Black colored, padded and sewn around the edges, 18mm strap with a silver toned buckle.

**Comments:** **American Made? That's Right!** Contrary to popular belief there still are a few watches being made in the USA. The Padgett and Ingalls Watch Company is located in Georgia and they produce a small quantity of watches with limited edition models.

**Item ID:** WNS-MDN-5013

**From the Makers:** "Our Appalachian model is from the Trail Guide series and features an all stainless case. The case has a screw back and double stem seals to increase the water resistance to 5 ATM. As on all PI watches the hands and hour markers are luminous. There is a North, South, East, and West mark in the middle of the dial. The seconds ring is divided into 5 second increments as were the old doctor's watches from the 1930's. The movement is a high grade automatic so it never needs batteries. Our case is a highly polished split lug design normally reserved for a much higher priced designer watches...A crown guard further protects your watch from breakage..."
